Strengthening Our Partnership in Europe

European Customer Business Update & Strategic Partnership

CSC Group connects diverse industrial capabilities

CSC Group: An Integrated Industrial Ecosystem

Engineering
Plant and equipment engineering

Industrial Materials
Resource recovery and materials

Steel Business
Steelmaking and processing

CSC · Dragon Steel · Chung Hung

Logistics & Investment
Shipping, trade and investment

Green Energy
Power and low-carbon energy

Cross-industry capabilities support long-term customer cooperation

CSC has the scale to support your steel requirements

CSC Company Snapshot

CSC Group Headquarters

3 Dec 1971

CSC established

20%

Government Shareholder

~16m MT

Group steelmaking capacity

9,249

CSC parent employees

11.25m MT

2025 steel sales volume

NT$317.155bn

2025 revenue

Two Taiwan works anchor our supply capability

CSC Kaohsiung and Dragon Steel, Taichung

CSC Kaohsiung

Kaohsiung, Taiwan

4 blast furnaces

10.0 million MT / year

Established in 1971

Dragon Steel

Taichung, Taiwan

2 blast furnaces + 1 electric arc furnace

5 + 1 million MT / year

Dragon Steel name adopted in 2004

Taiwan capacity supports a broad product range

CSC Group Production Capacity in Taiwan, annual nameplate capacity

Domestic demand anchors our global business

CSC domestic and export order intake

2025 **Total 9,514,893 MT**

Domestic 5,432,179 MT **Export 4,082,714 MT**

2026 **Total 10,095,143 MT**

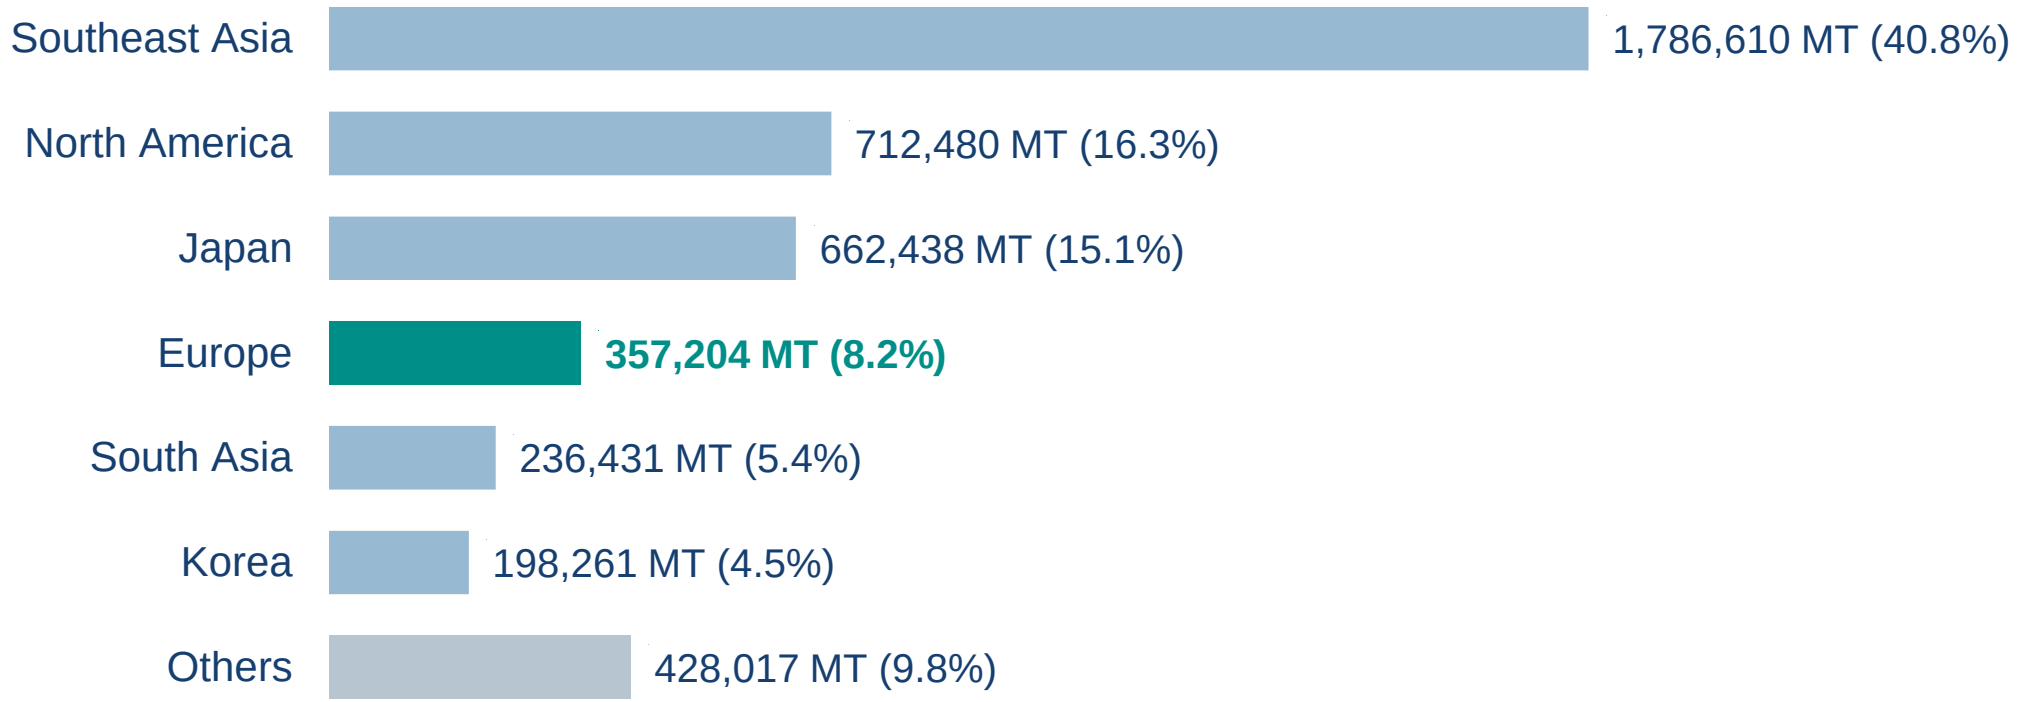

Domestic 5,713,701 MT **Export 4,381,442 MT**

Source: CSC OLAP, updated 3 Nov 2026. Order intake by order-year field. 2026 is an open-year snapshot, not full-year sales.

Our export reach spans major steel markets

2026 export orders on record: 4,381,442 MT

Europe: 357,204 MT · 8.2% of export orders

EU, Germany & UK: Orders and Product Mix

Order intake trends and key products | Updated 3 Nov 2026

Order Volume (MT)

Year	EU*	Germany	UK
2024	807,089	52,200	24,237
2025	493,998	59,323	96,388
2026*	**282,335**	**9,350**	**74,549**

2026 Key Product Mix

EU

Hot-rolled

58.9% 166,238 MT

ES 50,302 MT (17.8%)

Germany

Hot-rolled

64.2% 6,000 MT

HDG 3,000 MT (32.1%)

UK

Cold-rolled

40.9% 30,460 MT

HDG 21,110 MT (28.3%)
HR 20,875 MT (28.0%)

Different product mixes create opportunities for targeted cooperation.

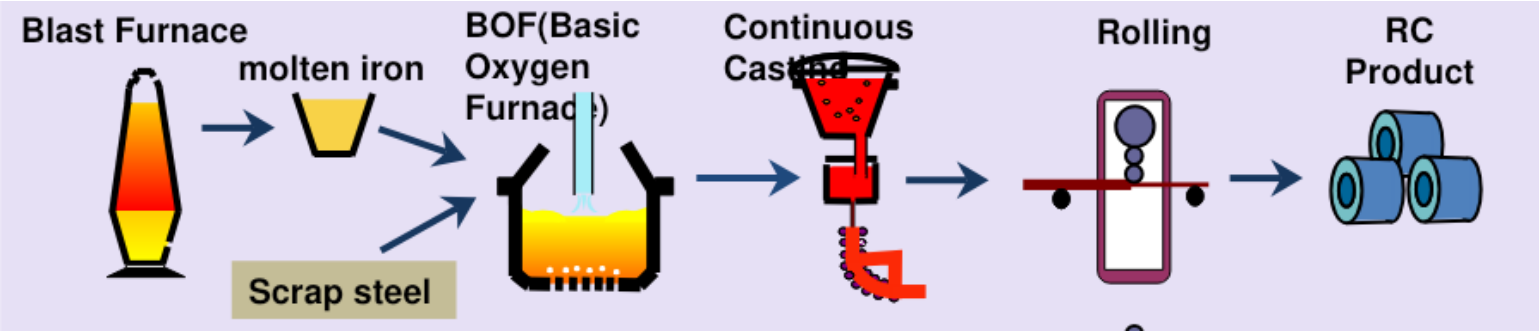

* Updated 3 Nov 2026

HR = Hot-rolled; HDG = Hot-dip galvanized; ES = Electrical steel.

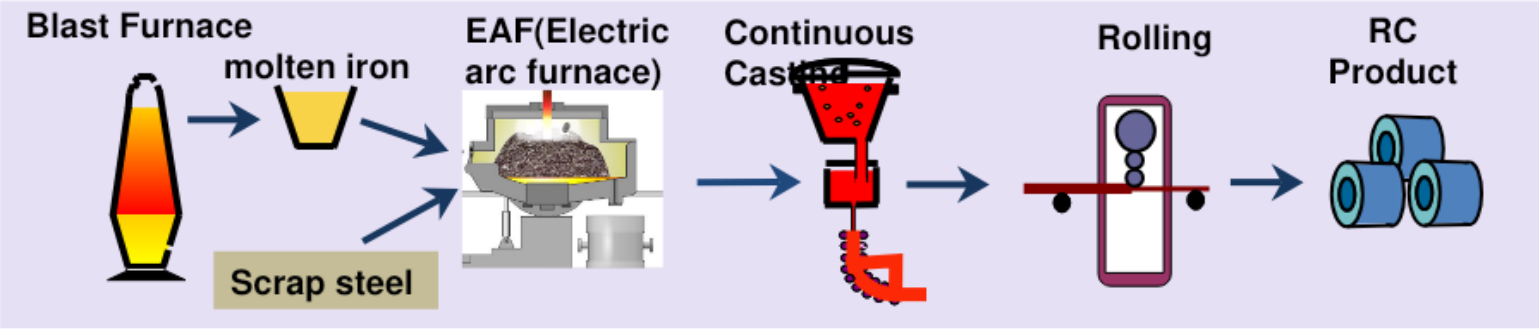

RC steel is already a commercial offering

Validated recycled content, with established commercial applications

CSC RC30 (≥30% recycled content)

Dragon RC60 (≥60% recycled content)

~74,000 MT

RC order intake
Jan–Aug 2026

~50% YoY

UL 2809 validated products

IF automotive RC30
Electrical-steel and IT uses

CR / galvanized RC90
Grade and certificate scope vary

CSC’s EU CBAM readiness

Carbon Border Adjustment Mechanism (CBAM) / From transitional reporting to formal verification

2023–2025

Transitional reporting

Quarterly emissions data for customers

Direct and indirect emissions by 8-digit CN code

Precursor sources reported from Q3 2024

H1 2026

SGS pre-verification

Calculation methodology review completed

Emissions levels similar to 2025
Formal data verification pending

Since September 2026

Formal verification

Engaging eligible CBAM verifiers

SGS is the preferred option given its familiarity with CSC’s systems and monitoring plan

Goal / Verified actual emissions data for customers’ EU CBAM declarations

Taiwan’s carbon pricing and CBAM

Climate Change Response Act / Carbon fee in the near term, emissions trading in the longer term

Carbon fee coverage and rates

Manufacturing, power and gas supply facilities emitting at least 25,000 tonnes of CO_2e annually

Standard NT$300 / Preferential A NT$50 / Preferential B NT$100 per tonne of CO_2e

2025
Carbon fee takes effect

Applies to 2025 emissions.

2026
First payment and dialogue

May payment for 2025 emissions. Stakeholder dialogue on ETS design.

2027–2030
Planned ETS pilot

Pilot trading based on facility reduction targets.

After 2030
Planned dual system

Carbon fee and emissions trading system (ETS) run in parallel.

Taiwan’s proposed CBAM

2 Nov 2026	President Lai reaffirmed the plan. Timing and scope pending.
Earlier scope	Cement first for trial reporting. Steel under review.
Earlier timing	Q1 2027 trial reporting for 2026 emissions (unconfirmed)
Why it matters	Comparable carbon costs for imports and local products

Challenges Persist, but New Opportunities Are Emerging

Global Steel Market | Challenges, Opportunities & Outlook

2027 Global Steel Demand

1,752 Mt **+1.7% YoY**

Source: worldsteel, Short Range Outlook, Oct 2026

2028 Global Excess Capacity

745 Mt

Source: OECD Steel Outlook 2026, Jun 2026

CHALLENGES

Trade Barriers

EU TRQs, CBAM and more AD measures

Oversupply

SEA expansion and China export pressure

OPPORTUNITIES

Selective Openings

Opportunities where competing origins face restrictions

AI-Related Demand

Data centers, IT equipment and power infrastructure

OUTLOOK

Short Term

Uneven recovery and continued competition

Medium Term

Modest growth with higher-value opportunities

Closer demand planning, product development and flexible sourcing will be key to future cooperation.

Mt = million metric tonnes

How CSC Can Support Your Business

Practical solutions for your 2027 steel requirements

Need a New Steel Grade?

Grade selection · Trials · Qualification

Steel tailored to your applications

Need Recycled-Content Steel?

RC options · Product documentation

Support for sustainable sourcing

Facing Processing Issues?

Forming · Surface quality · Troubleshooting

Technical problem-solving support

Planning Your 2027 Orders?

Volumes · Lead times · Delivery planning

Better visibility for future sourcing

Whatever your steel needs, let's explore how CSC can help.

Let’s Shape Our Future Partnership

Understanding your sourcing priorities, market outlook and future opportunities

01 Sourcing Strategy

What is your domestic vs. import sourcing mix?

What factors matter most in supplier selection?

02 2027 Market Outlook

How do you see steel demand and prices evolving in 2027?

Which sectors or products offer the best growth potential?

03 Your Feedback on CSC

How do you assess CSC’s products and services?

Where can we better support your business needs?

04 Future Opportunities

What new grades, applications or projects should we prepare for?

How can we strengthen our cooperation in 2027 and beyond?

Let's Explore New Opportunities Together.
